INTEL - MIDDLE EAST AS OF FRIDAY NIGHT-INTO-SATURDAY MORNING 2:46 AM EST

Hal Turner World March 07, 2026 Hits: 8636

The extent of what is happening in the Middle East is not known to public. There is a total media and social media blackout on any news coming out of Israel. Here's what they are hiding.

THIS CONTENT IS FOR SUBSCRIBERS ONLY

Iran has destroyed or incapacitated every single U.S. base in the region. Operations are being run out of India and the UK.

Iran did not select a new Supreme Leader.

Neither the U.S. nor Israel know where the current Iranian power structure is. No eyes. No ears.

Israeli missile defenses are nearly depleted. Massive, successful, strikes were carried out yesterday.

China and Russia are providing Iran with satellite intelligence and ENCRYPTED telecommunications.

The U.S. closed the Strait of Hormuz. There are mines and submarines threatening transit.

Boots will be on the ground in the immediate future. Likely THIS weekend. Israel armed the Kurds and told them they'd get US support for an offensive. Turkey made it clear to the U.S. any assistance with a Kurd offensive would be treated as a declaration of war on Turkey by Israel.

The UAE and Saudi Arabia are considering withdrawing all U.S. support. Their tourism industries have suffered irreparable harm and they have been left to hang out to dry.

The Israeli government is effectively operating in exile. Iran has used bunker busters to target the Israeli war cabinet with some success.

There is an imminent threat on US soil via rouge narco and weapons traffickers.

A War Powers resolution will be passed this coming week, APPROVING US Military Action, with mass deployment to follow.

Germany will be the first European country to enter the war.

Iran has publicly warned that any European nation (or the EU at-large) who joins the war, will be targeted by Iranian missiles.

FROM AN ISRAELI JOURNALIST:

Israeli journalist, Alon Mizrahi:
"We are witnessing history. Iran is, to the surprise of everyone, fucking up US bases so thoroughly and extensively and so decisively that the world

isn’t ready to see it."

"In 4 days, Iran has managed to expand its scope of military domination in the region. Iran has destroyed the most precious, most expensive military bases, assets and equipment in the whole world. American bases in Bahrain and Kuwait and Qatar and Saudi Arabia are some of the biggest military installations in the entire world. These are assets that took trillions to build over the course of several decades. We’re talking a major chunk of military expenditure for over 30 years, going up in smoke.

We are seeing radars costing hundreds of millions of dollars a piece being destroyed in an instant. We are seeing entire military bases being abandoned and burned, decimated and destroyed. And I’m telling you from my knowledge, the US has never suffered such devastation in its entire history, except maybe Pearl Harbor but that was one attack.

No enemy in a normal war has done to the US military what the Iranians are doing to the US military right now. This defies belief. The military situation is so bad that censorship blocks practically every piece of new information about this war. If you’ve noticed we’re being exposed to less and less every day.

Thirty-five years ago during the first Iraq war, we were being shown endless footage from Iraq. The smart bombs and the cameras were a novelty back then, but every night we were being shown night footage. Now we are seeing almost no video.

Understand this! This is supposedly the worlds biggest military power having the worlds biggest air capabilities and for 4 days when the US is on the offensive, supposedly and is supposed to be breaking through Iranian defenses we are seeing NO signs of American domination over Iranian skies. Where is all the footage of our planes flying over Tehran or any part of Iran for that matter?

American soldiers can not even dream of setting foot in Iran. And to understand how desperate this war is, that on the 4th day you’re already

hearing the craziest suggestions and ideas from the Trump administration. They are suggesting to send military escorts for oil carrying vessels coming out of the Persian gulf. What are you even talking about?! You want to send American ships into the range of thousands of Iranian missiles? NO ONE can pass through the strait of Hormuz right now.

The Iranians have been preparing for this for decades. They're flaunting this idea of arming Kurdish militias to invade Iran. What the FUCK are you talking about? Have you seen a map of Iran?! It seems like the Trump administration has never seen a map of Iran! Do you know how massive it is? What do you mean invade Iran?! You think a 10,000 man militia can invade Iran?! Or even 50,000?! Or 100,000?! Iran will swallow them.

The US and Israel have already lost this war. The US and Israel can kill millions of civilians in their homes. They have huge bombs and can explode buildings, but they will not win this war. Iranians military infrastructure and weaponry is so far underground ALL OVER IRAN. There is no way for the Americans and definitely not the Israelis to reach any of it. They are FUCKED.

They have started something they have no chance of bringing to an end. When this is over the US will never come back to West Asia. There will be no American presence in the Middle East. I'm telling you this now with certainty."

-Alon Mizrahi, Israeli journalist and peace activist on Substack
